

PRODUCT SPECIFICATIONS

SEETUL

SEETUL grades are formulated from specially selected lube base stocks to provide low pour point, low floc point, dryness, good chemical stability and ready solubility in liquified refrigerants.

SEETUL N grades have additional characteristics of low freon floc point, (-) 40 °C.

SEETUL grades are recommended for wide range of refrigeration compressors, both reciprocating as well as rotary, using all conventional refrigerants except sulphur dioxide.

SEETUL N grades are recommended for the lubrication of hermetically sealed refrigeration compressors.

SEETUL grades meet IS: 4578-1989 specifications.

Product Characteristics :

	SEETUL			
Characteristics	N32	46	N68	100
Viscosity, cSt @ 40°C	32	46	68	100
Viscosity Index	50	55	55	60
Flash Point, COC, °C, Min.	160	160	170	200
Pour Point, °C	(-)-38	(-)-27	(-)-27	(-)-26
