

HYCOM NH GRADES

Hycom NH grades are specially developed oil for excellent lubrication of Compressors where various types of gases are compressed.

It is blended out of highly refined turbine base stocks and special types of anti-oxidants, anti-rust, anti-foam and demulsifier which do not react to any of the types of gases. This oil has good demulsibility property, low deposits and sludge forming tendency at a wide range of working temperature and in any gaseous atmosphere.

It meets DIN 51506 VDL specifications. It also meets the required specifications of BHEL for their make of Ammonia and Synthetic gas Compressors. It passes the test specifically meant for ammonia oxidation.

PERFORMANCE BENEFITS:

- Non reactive with Ammonia , Carbon dioxide and any other Synthetic gases
- Very good oxidation and chemical stability
- Excellent extreme pressure characteristics & high FZG rating
- Good resistance to foaming
- Full protection against rusting

APPLICATION:

This oil is suitable for use in all types of Ammonia and Synthetic gas Compressors .It is suitable for use in both screw and centrifugal type compressors and is compatible with any other oil with conventional additive system.
