

## **HP JOB KOOL**

### **SPECIAL FEATURES**

HP JOB KOOL is a soluble cutting oil blended from mineral oils and suitable additives to provide excellent cooling and lubricating properties. It forms a milky white emulsion with water having good stability.

### **SPECIFICATION**

It meets the requirements of IS: 1115-1986 (reaffirmed 1991).

### **APPLICATION AREA**

HP JOB KOOL is recommended for general purpose machining operations requiring emulsifiable cutting fluids. It provides excellent surface finish for the work piece and protects both the job and the machine components against rust and corrosion.

### **PHYSICO CHEMICAL PROPERTIES**
